

Complete Soxhlet Extraction Apparatus

MODEL: 191.205

TECHNICAL SPECIFICATIONS:

- Material: glass

Soxhlet extraction apparatus with bulb condenser / coil according to the equipment, with the following components:

- Refrigerant to be coupled to the condenser
- Condenser (siphon) with 29/32" mouth.
- Universal support according to the equipment, its function is to support both the refrigerant and the siphon.
- 2 universal metal clamps
- Distillation ball: 500 mL, with 29/32" mouth.
- Heating mantle with capacity for 500 mL ball Connectivity: AC220/110V \pm 10%,50/60Hz
- Laboratory hoses
- Total weight of the assembled equipment: 8Kg
- Overall dimensions of the assembled equipment (WxDxH): 800x250x800mm
